What Is Claimed Is:

- 1. A method of killing a cancer cell, the method comprising contacting the cancer cell with an inhibitor of a gene selected from the group consisting of CDK8, STK33, PRKCM, PRKACA, ACVR1B, CDK5R1, CDC42BPB, MPP6, and CDC42BPA.
- 2. The method of claim 1, wherein the inhibitor is contacted to the cancer cell in a sterile composition comprising a pharmaceutically acceptable carrier.
 - 3. The method of claim 1, wherein the inhibitor is an siRNA.
- 4. A sterile pharmaceutical composition comprising a nucleic acid capable of inhibiting a gene selected from the group consisting of CDK8, STK33, PRKCM, PRKACA, ACVR1B, CDK5R1, CDC42BPB, MPP6, and CDC42BPA in a pharmaceutically acceptable carrier.
- An inhibitor of the expression of a gene selected from the group
 consisting of CDK8, STK33, PRKCM, PRKACA, ACVR1B, CDK5R1,
 CDC42BPB, MPP6, and CDC42BPA comprising an oligonucleotide having a nucleotide sequence selected from the group consisting of SEQ ID NOS: 1-6 and 11-78.
